**Dikey Tül Perdenin
tek bir parçasının
lekelenmesi durumunda
sadece o parçayı
yıkayarak kolayca
ürünün temizliğini
sağlamakla kalmazsınız
aynı zamanda birçok
açıdan da
tasarruf etmiş
olursunuz.**

Dikey Tül Perde
Multi System

Bu perde türünde montaj yapılacak alanda perdenin rahat hareket edebilmesi için en az 20 cm derinlik bulunması gereklidir. Kartonpiyer ya da ışık bandı uygulaması olan yerlerde yeterli alan yoksa L ayak ile duvara montaj yapılmalıdır.

Dikey zebra tül perdede üretimden sonra yükseklik ayarı yapılamayacağından perde yere değmeyecek şekilde yerden en az 3cm yukarıda bitecek şekilde ölçü alınmalıdır.

Dikey zebra tül perdeleri doğrudan tavana, korniş aparatı ile kornişe, L ayak aparatı ile duvara monte edebilirsiniz.

- Duvar dibinden 10 cm ya da daha fazla pay bırakılacak şekilde tül dikey perdenin kasasının monte edileceği noktalar 50 cm aralıklarla işaretlenir.
- Dikey zebra tül perde ile birlikte gelen portray aparatları montaj şekline göre kornişe, L ayağına ya da doğrudan tavana 50cm aralıklara işaretlenen noktalara önce dübel geçirerek vidalanır.
- Perdenin mekanizmasının öncelikle arka kanalı portray üzerine oturtulur.
- Daha sonra önden sıkıca bastırarak mekanizma portray üzerine yerleştirilir ve montajı tamamlanır.
- Mekanizmanın montajı tamamlandıktan sonra perdeler paketlendiği sırayla plastik aparatlarından mekanizmadaki kliplere geçirilir, erkek ve dişi tokalar birbirleriyle birleştirilir.
